YOUR SOURCE FOR ABOVE-GROUND EV CHARGING PLATFORMS

COMPANY OVERVIEW

DC-America is a privately held small business founded in 2021 by the ownership teams of Cenergy, LLC and Dixon Electrical Systems, combining 38 years of energy industry experience. Headquartered in Milton, West Virginia, DC-America engineers, manufactures, commissions and installs complete, modular above-ground platform-based, electric vehicle (EV) charging depots for government, civilian, and commercial customers.

DC-America's highly trained and knowledgeable personnel work together as a cohesive team to provide our customers with the right product for the right application with minimal civil disturbance. Our energy and electrical industry expertise, along with extensive experience in engineering, metal fabrication, project and construction management, enables us to meet our customers' individual needs on time and under budget.

CORE COMPETENCIES

- Original Equipment Manufacturer (OEM) of patent pending, engineered steel and aluminum modular platforms for electric vehicle charging depots
- Engineer, construct and commission Electric Vehicle Supply Equipment (EVSE)
- Consulting and site assessment for Electric Vehicle Supply Equipment (EVSE) charging infrastructure
- Construction project management
- Metal fabrication, U.S. steel and aluminum
- Electric Vehicle Infrastructure Training Program (EVITP) certified trainers and electricians
- UL 508A industrial control panel fabricator
- AAMP and SSPC certified coating applicators
- OSHA Gold Shovel accredited

Let's build the future together...

OUR DIFFERENTIATORS

We continuously provide the highest level of customer service and technical expertise to our customers throughout the engineering, manufacturing and installation process.

We focus and invest in continuous product improvement and safety; our personnel are licensed master electricians, certified EVITP electricians, multi-state Professional Engineers, structural welders certified to meet AWS standards, and AAMP certified coating applicators.

We have a proven track record of delivering high quality products on time and under budget; our single-point connection depots are customized to meet our client's unique needs and streamline the construction process with minimal disturbance to existing civil infrastructure. OSHA recognizes us as Gold Shovel accredited.

We consistently reduce risk and cost for our customers; our above-ground prefabricated and fully commissioned charging depots are delivered and ready to charge anywhere across North America.

CUSTOMER ACCOLADES

"DC-America is an outstanding partner in installing EV Charging Stations. It is refreshing to work with an innovative partner that is dedicated to customer satisfaction and who excels at cost control and exceeding expectations."

David P. Shafer, Energy Manager
NFG NG WVARNG (USA)

"DC-America's knowledge and partnership in the EV Charging market has really accelerated Lincoln Electric's entrance in the DC Fast Charging space. Besides being one of the first to recognize Lincoln's potential to transform the negative experience with fast charging that exists in the market today, DC-America's first class products, facilities, support and installation expertise have been invaluable in multiplying our efforts. I would highly recommend DC-America to any customer or company looking for a valuable partner in the fast changing EV Charging market."

 Steve Sumner, Vice President Corporate Innovation
